

KIIT automatr_

**Chatbot designed for KIIT to help make daily tasks
finish in a snap**

Seamless Integration

Ever missed an assignment or a mail of an important event?
Now fear no more with the easy integration of all services
into a single platform which makes sure you
wont miss a single bit information.

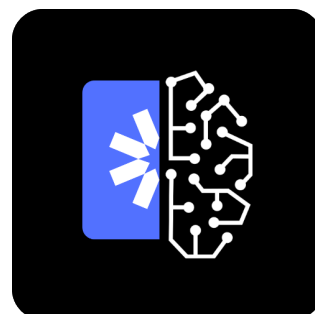

Objective

- Daily Attendance Report
- Interaction with ChatGPT
- Unifying resources from Classroom, Gmail and more
- Navigate with maps for classes
- Weather Forecast with Rain Alert

Advanced AI Algorithm

Whether you need to generate a handwritten assignment,
utilise NLP to create and schedule reminders, communicate
with OpenAI's ChatGPT, or simply want to know the
weather, Automatr have got you all covered.

Objective

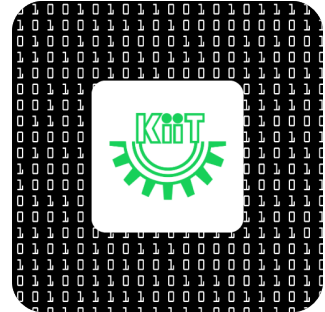

- Converting message to machine readable format (NLP)
- Interacting with ChatGPT
- Generate handwritten text for only help in assignment
- Weather forecast with rain, cyclone, earthquake alerts
- CGPA Prediction

Rules

No illicit use of AI to generate assignments

Perosnalized for KIIT
